NoFeeSwap disclaimers - **operator**[*]

1. **Potentially populated transient storage:** The content of transient storage slots in Operator.sol should not be assumed to be zero, as they may contain data from previous calls.

2. **Lack of ERC-7751 compliance:** Operator.sol does not follow ERC-7751. Error messages are relayed back directly without bubbling, if instructed by the payer.

3. **Leftover native balance:** After each call, the leftover native balance in the Operator contract is transferred to the payer. Users should account for this behavior.
